Please enter your Last name and First name.
- Start Date (利用開始日)
Please enter start date of using virtual machine.
The shortest start date is 1 day after the application.

- End Date (利用終了日)

Please enter end date of using virtual machine.

The maximum usage period of one reservation is 28 days.

- Number (台数)

Please enter the number of using virtual machines.

- Template (テンプレート(OS))

Please select the template (OS) for virtual machine.

• base-group-shared-server-app

OS : Cent OS 7.4

Software : applications and compilers described in the [manual](#) are installed.

• base-group-shared-server

OS : Cent OS 7.4

Software : applications and compilers described in the [manual](#) are not installed.

- Virtual Machine Spec(仮想ホストスペック)

Please select the spec for virtual machine.

The maximum available resource for virtual machine is 36 CPU cores. The product of the number of CPU cores and number of virtual hosts should not exceed 36.

- Cancel(キャンセル)

If you go back to top page, please click “キャンセル(Cancel)” button.

- Reservation(予約)

After entering the virtual machine information, you click “予約(reservation)” button to apply for reservation of virtual machine. When the confirmation dialog will pop up, please check the application details and press "OK" button.

When the virtual machine is ready, reservation portal will send an invitation e-mail to your entered e-mail address.

* Depending on the usage status of the virtual machine, you may not be able to make a reservation.

In this case, please confirm the availability date on the congestion state check, and change usage date and virtual machine spec.

2.4. Virtual Machine Reservation Check

You can check your reservation status by the reservation table.

If you want to check detail of your reservation, please click your user ID on the reservation table.

* Please click link inside the red frame in the figure below.

The screenshot shows a web browser window titled '予約一覧' (Reservation List). The URL in the address bar is https://cmsportal.sc.imr.tohoku.ac.jp/reservation_portal/reservationList. The page contains a reservation table with the following data:

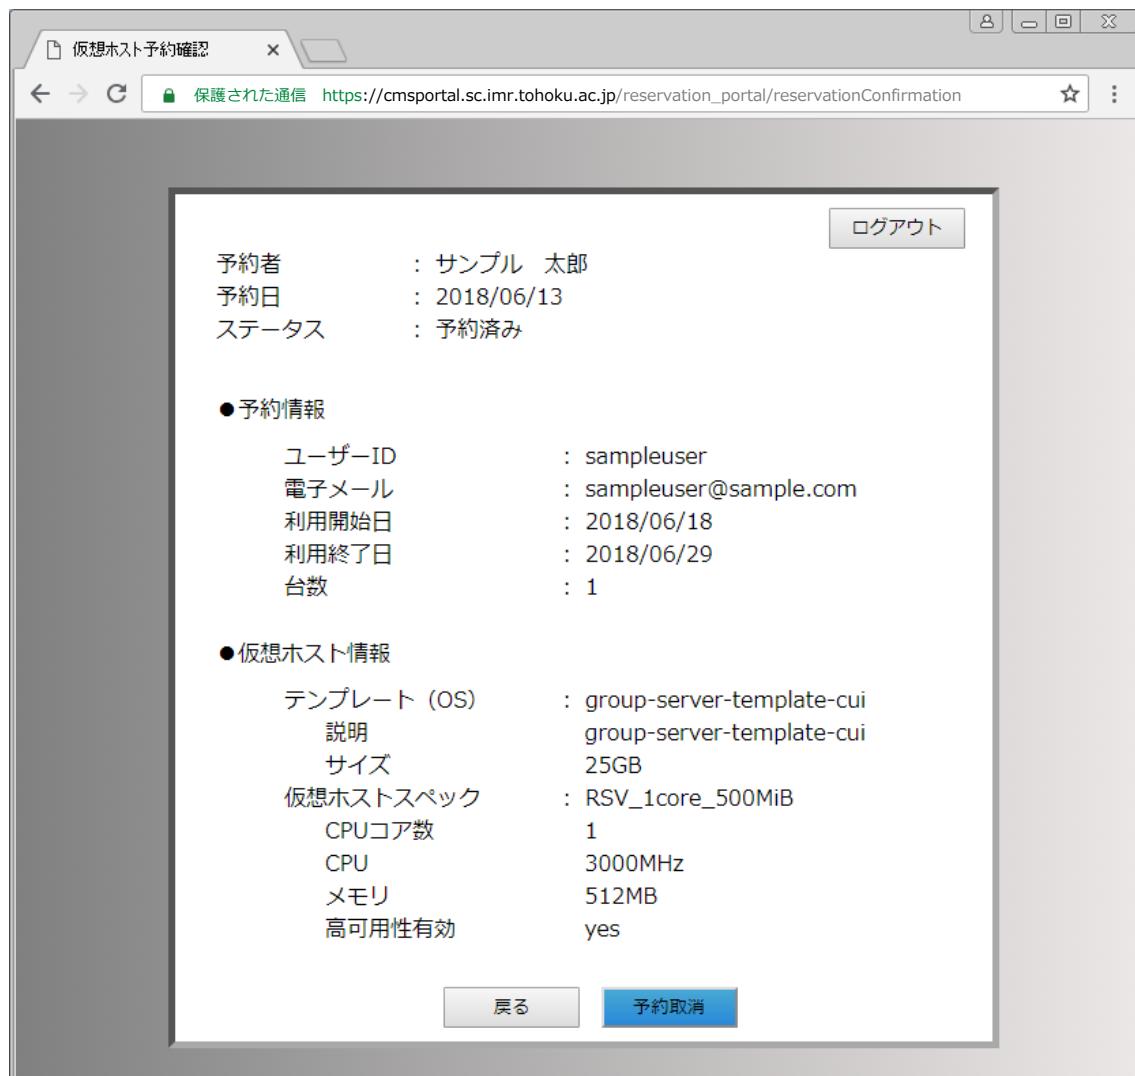

No	ユーザーID	予約者	予約日	ステータス	利用開始	利用終了
1	sampleuser	サンブル 太郎	2018-06-13	予約済み	2018-06-18	2018-06-29

A red box highlights the 'sampleuser' link in the 'ユーザーID' column of the first row. The page also features several buttons at the top: '独自環境申請' (Own Environment Application), '仮想ホスト予約' (Virtual Host Reservation), '混雑状況確認' (Crowd Status Confirmation), and 'ログアウト' (Logout). There are also search and filter controls at the top right.

2. Reservation Portal Service
